

Light and Space:

Photographs by Architects

December 12— December 17, 2016
Reception: Monday, December 12, 2016, 7-9pm

New York, NY – December 2, 2016 – FRONT art space is pleased to present *Light and Space: Photographs by Architects*, an exhibition featuring the photography of nine architects currently working full-time at Selldorf Architects.

The camera has become an indispensable tool for architects not only to document the buildings they have created but also to record locations, spaces, and objects of interest. Bridges, mountains, abandoned buildings, skies, and flowers are just a few of the elements captured that become a central source of inspiration. This exhibition provides a small window into the way architects view, study, and perceive the world.

Over forty photographs and collages will be on display by Jonathan Chesley, Jeanie Fan, Simon Fässler, Andrew Fu, Andreas Fuchs/Luisa Overath, gabriella horn, Dionisio Cortes Ortega, Nicholas Venezia, and : (pronounced 'colon').
